

# Electron Microscopy Core

University of Missouri

## Post-COVID Re-Opening

5/17/2021

May 2021 Post-COVID EMC Policies:

- Masks must be worn at all times
- No more than two masked people per room
- Attempt to maintain social distancing at all times
- Wipe down high touch surfaces

Retraining required:

- Even if you were independent prior to COVID, we request that you become retrained
- Our billing/reservation system (FOM) deactivates your account within 1 year of inactivity
  - o Do NOT re-register as a new user
  - o Contact EMC staff for a training upon which your independence will be reinstated

Zoom-capable microscopes:

- Due to our restricted people per room, a nice feature we have figured out is "Microscope-Zoom sessions"
- During your scheduled use, you can have your fellow scientist join remotely on the imaging session to see the microscope interface visualizing samples together.
- This feature has become very popular and investigators learn much more about their samples by being present while the data is collected.
- Ask your favorite staff member how to enable a "microscope zoom session" for your colleagues to watch!

We look forward to seeing you again @MizzouEMC!
